Netherlands Journal of Agricultural Science

Volume 41 (1993)

Subject index

This index lists the keywords given in the headings of the papers. A number refers to the first page of the paper involved

ageing 23
agro-ecology 1
ammonia
– treatment 111
– volatilization 63
balanced fertilization 327
barley 167
–, winter 153
biomass 309
carbohydrates, water-soluble 221
carbon dioxide 309
carbon storage 309
cattle 47
– slurry 81
– slurry, treated 81
cereals, winter 221
chloride 13
climate change 309
CO_2 309
continuous grazing 179
cow 221
–, dairy 179
cultivar 23
cutting 179
defaunation 205
degradability 221
degradation, rumen 111
dicyaniamide 95
digesta flow 205
digestion, rumen 205
dormancy 23
dry matter production 153
durum wheat 1
embryonic mortality 37
exclosure cages 179
fast analysis 47
fermentation 221
fertilization 291
–, balanced 327
fertilizer recommendations 247
foliar diagnosis 291
forest
– fertilization 247, 267
– growth and yield 309
frost tolerance 1
FSH 37
gilts 37
GnRH 37
grain production 153
grass silage 221
grassland 81
grazing, continuous 179
growth and yield, forest 309
growth vigour 23
harvest index, nitrogen 221
harvesting time 167
herbage intake 179
hindgut passage 111
humus 309
intestinal protein 135
kinetics 221
landraces 1
leaching 267
–, nitrate 95
leaf area 153
lettuce 13
LH 37
lighting 13
liming 247, 267, 291
litter 309
– layer 327
liver selenium content 47
Lolium perenne L. cv. Wendy 179
moisture content 167
mortality, embryonic 37
needle contents 327
neutron activation 47
NFT 13
nitrate
– concentration 13
– leaching 95
nitric acid 81

nitrogen 247
– form 327
– harvest index 221
– response 179
–, soil mineral 95
– source 13
– uptake 221
– use efficiency 179
nitrous oxide 63, 81
nutrient solution, recirculating 13
organic matter, soil 309
perennial ryegrass 179
pH 63
physiological age 23
Pinus sylvestris 247, 267, 291
potato 23, 95
protein, intestinal 135
proton consumption 63
protozoa 205
Pseudotsuga menziesii 327
recirculating nutrient solution 13
redox potential 63
root growth 327
root zone 267
rumen 221
– degradation 111
– digestion 205
– microbial pool 135
– passage 111
rumination 111
rye, winter 153
seed tuber 23
selenium content, liver 47
selenium deficiency 47
sequestration 309
sheep 205
simulation 1
site of digestion 111
slurry 95
–, cattle 81
soil
– acidification 327
– mineral nitrogen 95
– organic matter 309
– solution chemistry 267
– solution composition 327
Solanum tuberosum L. 23
soybean oil hydrolysate 205
sprouting 23
storage temperature 23
sward quality 179
temperature 167
– of solution 13
–, storage 23
tiller
– density 179
– distribution 179
treated cattle slurry 81
tree growth response 291
triticale, winter 153
Triticum turgidum var. durum 1
tuber, seed 23
vigour, growth 23
volatilization, ammonia 63
water-soluble carbohydrates 221
wheat 167
–, durum 1
– straw 111
–, winter 153
– barley 153
– cereals 221
– rye 153
– triticale 153
– wheat 153
yield components 153
yield, forest growth and 309

Author index

Arnold, G. & A. van Diest, Response of a Scots pine (*Pinus sylvestris*) stand to application of phosphorous, potassium, magnesium and lime. 1. Soil data 247

Arnold, G. & A. van Diest, Response of a Scots pine (*Pinus sylvestrus*) stand to application of phosphorous, potassium, magnesium and lime. 3. Foliar nutrient concentrations and stand development 291
